Summary

I am a proactive full-stack web developer and problem solver with a never-say-die attitude. My goal is to provide employers with a significant return on their investment through my skills and dedication.

I hold the belief that the power of habits can turn any goal into reality; for me, it's not a question of 'if,' but 'when.

Professional Experience

School of Code | Birmingham
Junior Full Stack Developer | 09/2023 - Present

- Worked closely with diverse teams every week, solving problems together using a driver/navigator method.

- Broke down complex problems into smaller tasks by planning ahead before writing any code.

- Led project planning in teams of different sizes, using tools like Trello and bringing in different perspectives to tackle challenges.

- Went the extra mile by doing pair programming outside course hours to reinforce concepts and collaborate on projects.

- Embraced a proactive learning approach, quickly picking up new technologies in workshops, hackathons, and personal projects.

- Used agile methods and a growth mindset to handle challenges in a systematic way.

- Actively contributed to product development in agile teams, building dynamic full-stack applications using technologies like Node.js, Express, React, and PostgreSQL.

- Presented final products to industry experts, showing expertise in best practices like source control,

Projects:

Build - My personal idea, to increase diversity in tech.

Charity Build Project | School of Code Final Project

- Initiated and championed the concept of Charity Builders during the boot camp, envisioning a platform to connect junior developers seeking commercial experience with senior engineers for mentorship, all while creating websites for charities and non-profits to bolster their resume.
- Successfully persuaded a six-member final project team to choose and work on Charity Builders over other ideas and problems provided by the School of Code partners.
- Convinced mentors to support and kick start the project, gaining recognition and backing from the School of Code for the initiative.
- Participated in Segita Entrepreneur workshops, acquiring skills on kick starting startups from idea to product delivery.
- Took on the role of a product owner in the project, overseeing design, database structure, and Next.js frontend development.
- Led an agile team to deliver an outstanding end product that met the project's objectives and satisfied the needs of charities and non-profit organizations.
- Collaborated with team members, mentors, and School of Code to ensure the success and sustainability of the Charity Builders initiative.

Project: **Team-Wipit**

Team Wipit Project | School of Code Midterm Project

- Developed a full-stack, vanilla JS app named Team Wipit during the School of Code bootcamp.
- Specialized in backend development, creating CRUD functionality with Express.js and Node.js.
- Executed testing using Vitest and Supertest to ensure the reliability and functionality of the application.
- Contributed significantly to the creation of a comprehensive resource hub for storing links to bootcamp materials.
- Demonstrated proficiency in backend development, testing, and collaborative project execution.

Transport & Tailing LTD | Derbyshire, Derby
Self Employed | 04/2022 - 09/2023

- Client Relations: Established and maintained positive client relationships
- Project Management: Managed multiple projects concurrently, ensuring efficiency and maintaining high standards
- Time management: thrive in dynamic environments, consistently delivering high-quality work punctually. Prioritised tasks effectively to optimise productivity.
- Detail-oriented: Executed precise work, emphasizing meticulous attention to detail.
- Business Acumen: Founded and managed a successful tiling company, showcasing entrepreneurial skills

DHL, Amazon | Derbyshire, Derby
HGV Class 1 Driver | 08/2017 - 03/2022

During my five years as a lorry driver, I developed strong client relationships
by ensuring timely and efficient deliveries while promptly addressing customer concerns. Proficient in logistics management, I executed precise delivery schedules and coordinated multiple deliveries for optimal efficiency. I prioritised operational efficiency, maintaining vehicles for peak performance, and adapting to changing conditions, showcasing adaptability and problem-solving skills.
